

I am a satisfied VOOM customer and, along with my husband and daughter, I am against the sale and subsequent transfer of Rainbow DBS license/frequencies at 61.5 to Echostar. Cablevision is selling remaining VOOM assets to a newly formed private company called VOOM HD LLC who have clearly demonstrated a desire to maintain and operate the Rainbow-1 satellite and frequencies at 61.5. I urge the Commission to deny this sale and give VOOM HD LLC an opportunity to maintain programming at their current location. The Commission has previously ruled that addition DBS providers (especially one that is currently providing 41 High Definition channels) is in the best interest of the public
